

POWIS PhotoPress™

THE POWIS PHOTOPRESS™ SYSTEM is a fast and easy method of turning silver halide, dye sub and inkjet prints into beautiful, distinctive photobooks. The finished books rival the quality of traditional mounted albums, but the process takes a fraction of the time at a fraction of the cost. The PhotoPress uses pressure instead of heat to bind prints, so there is never any danger of heat damage to your photos. It's so easy that anyone can learn to make beautiful photobooks in just a few minutes.

The PhotoPress™ is the ideal addition to mini labs, central labs, pro labs, and photo stores that are looking for new sources of profitable revenue and wish to compete on equal footing with the on-line photo services. From a simple photo album to one complete with headbands and a decorative spine quarter panel, the Powis PhotoPress System does it all. Not only will your customers be delighted with the way their precious memories look, you'll be more than pleased with the way your bottom line looks.

Highlights

- Binds max. 0.75" (approx. 37 photos) in 1-2 minutes (4 minutes for 12" x 18")
- No heat pressure activated binding will not damage photos
- Binds large formats up to 12" x 18"
- Binds lay-flat photobooks
